Eric,

Attached are responses from Environmental Restoration and Guardian Environmental Services to our Fair Opportunity Notice regarding the Niagara Falls Boulevard Site RV1. Also attached is a copy of the Fair Opportunity Notice to assist you in your review of each contractor's responses to the evaluation criteria.

Ratings of responses must be noted in the appropriate criteria on the Contractor Selection form. For example, Item 1 should be considered under "Equipment and Labor Rates", Item 2 should be considered under "Location", Items 3 & 4 should be considered under Company Expertise" and Item 5 should be documented under "Past Performance". Good or bad assumptions made by the contractor, based on the information we provided, can also be mentioned under the appropriate criteria. Add your review findings to the standard items listed in each of the criteria on the Contractor Selection form. Please make sure you address each criteria Item for both contractors as part of your evaluation. Mark Pane can assist you, if needed.

As a reminder, for this task order we indicated that technical factors are equal to cost factors. **In addition, please remember that these responses constitute source selection materials and cannot be shared with any party outside of the EPA.**

Kudos for your Fair Opportunity Notice... very thorough!

Please give me a call if you have any questions.

Karen
